

Let's Draw Scribble!

Miri Leshem-Pelly

Don't worry if it doesn't come out looking exact.
There's no *wrong* way to draw!

1 Start with an oval shape. (Even better if you can make an egg-like or pear-like shape.)

2 Now add a dotted line for a necklace. (It should cross the oval shape from side to side, a little above the middle.)

3 On the upper half draw two circles. (These are the eyes!)

4 Add a black dot inside each circle. (Now Scribble can see you!)

5 Add 3 tiny lines at the top of each circle. (For eyelashes)

6 Between the eyes draw a tiny sideways "v". (Now Scribble can smell!)

7 Between the eyes and the necklace draw a curvy line. (Yay! Scribble is smiling!)

8 Above each eye add a curvy line. (That's her eyebrows)

9 Next, on each side of the oval add half a circle. (Finally, Scribble can hear you!)

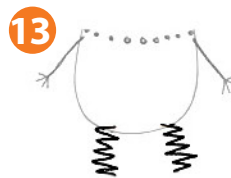

10 At the top of the oval draw a coiled spring going up. (Scribble loves her hair!)

11 Just below the necklace draw two lines, one on each side of the body. (That's the arms.)

12 Add 4 little lines coming from the end of each arm. (Now Scribble has fingers!)

13 At the bottom of the oval draw two zigzag lines going down. (These are the legs.)

14 At the bottom of each leg, draw a boot. (Now Scribble can walk!)

15 Good job!
Your Scribble is ready!
Now you can color in her body.
